# Inspector's Classroom Observation Sheet

**Observation Date:** _____

**Inspector:** Mohamed SAIDI **Specialty:** English Inspector (30 Years of experience)

**School:** Chiekh Larbi Tebessi secondary-school, Tebessa.

**Observed Group:** ☐ Experimental (ICM) ■ Control (Traditional)

**Observed Week:** ■ W1 ☐ W2 ☐ W3 ☐ W4 ☐ W5 ☐ W6

**Session(s):** ■ 1 ■ 2 ■ 3

*Instruction:* Complete the Section A table that matches the observed group. The other Section A table may be left blank.

## A. Instructional Format and Feedback Cycle

### A1. Experimental Group (ICM)

| S. | Observed Feature | Y. | P. | N. | Evidence / Notes |
|---|---|---|---|---|---|
| 1 | Teacher introduces the prompt and activates prior knowledge or task understanding. | ☐ | ☐ | ☐ | |
| 1 | Students work in small collaborative groups (e.g., 4–5 learners) with visible role-sharing or coordinated drafting. | ☐ | ☐ | ☐ | |
| 1 | Groups produce one collaborative draft for submission. | ☐ | ☐ | ☐ | |
| 1 | Teacher collects drafts and applies coded feedback symbols only, without direct written correction. | ☐ | ☐ | ☐ | |
| 2 | Teacher returns drafts with coded symbols and students begin decoding them. | ☐ | ☐ | ☐ | |
| 2 | Students discuss the codes and negotiate corrections within groups or with peers. | ☐ | ☐ | ☐ | |
| 2 | Peer exchange across groups occurs and the teacher facilitates without supplying direct answers. | ☐ | ☐ | ☐ | |
| 3 | Groups revise and complete a final draft that incorporates coded and peer feedback. | ☐ | ☐ | ☐ | |
| 3 | Final presentation, summary feedback, and individual reflection closes the cycle. | ☐ | ☐ | ☐ | |

Note: S.: Session, Y.: Yes, P.: Partly, N.: No

## A. Instructional Format and Feedback Cycle (continued)

### A2. Control Group (Traditional Correction)

| S. | Observed Feature | Y. | P. | N. | Evidence / Notes |
|---|---|---|---|---|---|
| 1 | Teacher introduces the writing prompt or task without collaborative modelling. | ■ | □ | □ | Teacher spent 10 minutes explaining the prompt. Defined key terms. No collaborative planning. |
| 1 | Students draft individually and work mostly in silence. | ■ | □ | □ | Students sat at tables for two but worked individually. No speaking. Classroom was silent for 50 minutes. |
| 1 | Drafts are collected at the end of the session. | ■ | □ | □ | Teacher walked between rows collecting papers. Drafts incomplete (average 50–70 words) |
| 2 | Students continue the same essay individually; no pair or group discussion is required. | ■ | □ | □ | Students continued drafting individually. No pair discussion. |
| 2 | Teacher circulates mainly to answer individual questions rather than facilitate peer learning. | ■ | □ | □ | Teacher answered 3 individual questions. Didn't encourage peer discussion. |
| 2 | Teacher collects completed drafts for home correction or later return. | ■ | □ | □ | Drafts collected at end of session 2. Teacher took them for correction. |
| 3 | Corrected essays are returned with underlining and direct written correction. | ■ | □ | □ | Essays returned with red underlines and correct forms written above/beside errors. |
| 3 | Students review corrections individually, with limited questioning. | ■ | □ | □ | Students glanced at corrections. Only 2 questions asked about corrections. |
| 3 | A model text or teacher-provided correct version is supplied and copied. | ■ | □ | □ | Teacher wrote a 120-word model text on the board. Students copied verbatim for 40 minutes. No explanation provided. |

Note: S.: Session, Y.: Yes, P.: Partly, N.: No

## B. Student Engagement and Interaction

| Indicator | V. L. | L. | M. | H. | V. H. | Notes |
|---|---|---|---|---|---|---|
| Attention during teacher explanation or task briefing | ☐ | ☐ | ■ | ☐ | ☐ | Students listened to prompt explanation. No questions asked. |
| Engagement with received feedback or corrections | ☐ | ☐ | ■ | ☐ | ☐ | essays returned with red corrections. students glanced briefly. |
| Quality of peer or pair interaction (when relevant) | ■ | ☐ | ☐ | ☐ | ☐ | No peer interaction. |
| Willingness to ask questions about errors or revisions | ■ | ☐ | ☐ | ☐ | ☐ | only 2 questions asked about corrections. |
| Use of metalanguage (e.g., tense, agreement, article, punctuation) | ■ | ☐ | ☐ | ☐ | ☐ | No metalanguage used. students could not name error types. |
| Student-initiated correction or revision | ■ | ☐ | ☐ | ☐ | ☐ | No revision attempted. students set essays aside after glancing. |
| Overall participation and on-task behaviour | ☐ | ☐ | ■ | ☐ | ☐ | students complied with copying model text. Behaviour orderly but passive. |

Note: V.L.: Very Low, L.: Low, M.: Moderate, H.: Height, V.H.: Very Height.

**Estimated percentage of actively engaged students:** 15-20 %

**Inspector's Note:**

First week of traditional correction. Students complied with copying task but showed minimal engagement with corrections. No peer interaction. Classroom orderly but passive.

## C. Classroom Dynamics and Teacher Practices

| Observation Category | Notes |
|---|---|
| Clarity of instructions and task guidance | Instructions clear. Teacher explained prompt. No peer collaboration. |
| Responsiveness to students' questions | Teacher responded to questions. Few questions asked. |
| Type and quality of feedback provided | Red underlines + direct corrections with above/beside errors. No coded symbols. corrections accurate. |
| Classroom organization, seating, and noise level | Students sat at tables for two. classroom silent. No collaboration. |
| Time management across phases or sessions | Time was not utilized in a productive manner. |
| Use of board, model text, coding system, or visual aids | Model Text written on board. Students copied verbatim. No coding system. |
| Evidence of student autonomy and self-correction | None. Students waited for Teacher to correct errors. |
| Encouragement of discussion, revision, or reflection | No discussion, revision, or reflection encouraged |

## D. Comparative Lens (Optional)

| Dimension | Experimental Group (ICM) | Control Group (Traditional) |
|---|---|---|
| Nature of feedback provided | Coded symbols only | Red underlines + direct corrections. |
| Teacher role during correction | Facilitator, observer | Corrector, model provider |
| Student role during the lesson | Autonomous decoder, collaborator, reviser, presenter | Passive receiver, copier |
| Peer interaction and collaboration | Extensive (within groups, between groups, presentations) | None |
| Student engagement with feedback | 92–95% actively engaged. | 10–15% glanced at corrections |
| Revision requirement | Yes (final revised draft everyweek) | No (only copied model texts) |
| Use of metalanguage | Consistent and accurate | None |
| Observable learning behaviours | Decoding, discussing, debating, revising, presenting, reflecting | Copying, glancing, waiting |
| Student autonomy | very high | None |
| Evidence of progress or improvement | Significant (errors reduced, writing quality improved) | very modest (almost the same errors as week 1) |

**Comparative Note:**

week 1 serves as baseline for both groups. The EG shows emerging signs of active engagement and frequent peer interaction. The CG remains passive with no peer interaction

## E. Challenges or Constraints Observed

| Challenge | Y. | N. | Description / Evidence |
|---|---|---|---|
| Confusion with feedback symbols, instructions, or task expectations | ☐ | ■ | No symbols used. Instructions clear. |
| Limited engagement with feedback or corrections | ■ | ☐ | Students glanced at corrections, then set essays aside. |
| Uneven participation among students or groups | ☐ | ■ | No group work |
| Over-reliance on teacher confirmation or direct answers | ■ | ☐ | Students expected Teacher to fix all errors. |
| Weak or absent peer interaction where collaboration was possible | ■ | ☐ | No peer collaboration |
| Mechanical copying or superficial completion without understanding | ■ | ☐ | Students copied model Text without analysis or questions. |
| Difficulty moving between phases, tasks, or transitions | ☐ | ■ | No phases. |
| Off-task behaviour, distraction, or loss of focus | ☐ | ■ | classroom orderly. |
| No visible revision or limited transfer of feedback to later writing | ■ | ☐ | No revision attempted |
| Other (specify):_____ | ☐ | ■ | None observed. |

Note: Y.: Yes, N.: No

## F. Overall Impression and Summary Comments

**Strengths observed during the session:**

1. Teacher corrected all 34 essays accurately.
2. Model Text was clear and appropriate.
3. Students copied model Text with 85 – 90 % attentiveness.
4. Classroom was orderly and quiet.

**Weaknesses / concerns observed:**

1. Minimal student engagement with corrections (15 – 20 %)
2. No peer interaction
3. No revision required
4. Students copied model Text without understanding.

**General summary comment:**

Week A of traditional correction shows compliance but not engagement. Students copy model Texts diligently but do not engage with their own errors. the method is orderly but pedagogically limited.

## Recommendations for Subsequent Sessions

1. Require students to write one sentence explaining each correction.
2. Allocate time for peer discussion of corrections.
3. Ask students to revise at least one paragraph.
4. 
5. 

**Final Summary Comment from the Inspector:**

Traditional correction produces compliant students but not engaged learners. Students copy model Texts but do not internalise them. without revision or peer discussion, learning gains are unlikely. the Teacher is diligent, but the method is the limitation.
